10th

Sri Teja E.M& T.M High School

06/2016 - 03/2017,

80%

PERSONAL PROJECTS

Performance Evaluation of Solar PV Integrated Hybrid Fuzzy-Logic Controlled Multi-Functional UPQC for Enhancing PQ Features (B-TECH) (11/2022 - 03/2023)

- Most of the power pollution issues created in power distribution systems are due to the non-linear characteristics and fast switching of power electronic equipment. In general, passive filters are used for compensating voltage harmonics, but these passive filters doesn't gives good compensation features and have various demerits like limited compensation characteristics, high transient response, etc. Modern power electronics devices like active power filter and comprehensive simulation study of relay give the idea of power quality improvement.

Home Appliances Controlled by remote (B-Tech)
(02/2022 - 04/2022)

- The influx of the Internet of things (IoT) devices has created a huge demand for connecting everything to everything. In the same race, this remote control for home appliances lets you connect your regular everyday appliances to be controlled by a remote.
